SUMMARY:

Full-Stack Software Developer graduate with hands-on experience in frontend and backend development. Led frontend development for university software engineering projects, building responsive web and mobile applications using React, React Native, Django, PostgreSQL, and Firebase. Passionate about developing scalable software solutions and continuously expanding technical expertise.

TECHNICAL SKILLS:

- **Frontend** – React Js, Next js, JavaScript, TypeScript
- **Backend** – Node.js, Express.js, TypeScript, Java, REST APIs
- **Database** – MySQL, MongoDB, PostgreSQL(basics)
- **Tools**- Git, Docker (basics), AWS (basics)

EDUCATION:

Bachelor of Computer Science | **Latrobe University**, Bundoora | July 2023 - Jun. 2026

CERTIFICATIONS:

- [AWS Educate](#) – Introduction to Cloud 101

PROJECTS:

 [SKOPE](#) – Remote Telescope Control Platform *3rd year - Sem 1*

Frontend lead | React, JavaScript, Bootstrap, Django, PostgreSQL

- Led frontend development as the sole frontend developer for the project.
- Built responsive interfaces for viewing real-time visible celestial objects.
- Developed observation workflows allowing users to select targets and control telescope operations.
- Integrated Stellarium API and ASCOM Simulator functionality for telescope control.
- Collaborated with backend developers to connect frontend features with Django services and PostgreSQL databases.

 [STEMMLab](#) – Mobile Learning Application *3rd year – Sem 2*

Development lead | React Native, Expo, Firebase, TypeScript

- Led development of a cross-platform mobile application for STEM learning activities.
- Implemented Firebase Authentication and Firestore for user management and cloud storage.
- Integrated device features including GPS, accelerometer, gyroscope, and flashlight functionality.
- Developed activity tracking and history management features.
- Collaborated using Git and GitHub within a team-based software engineering environment.

 [Portfolio Website](#) *(In Progress)*

Next.js, TypeScript, Bootstrap, GitHub, Vercel

- Developing a personal portfolio website to showcase software engineering projects, technical skills, certifications, and professional experience.
- Building a responsive user interface using Next.js, TypeScript, and Bootstrap.
- Integrating project showcases, downloadable resume functionality, and contact information.
- Planning deployment through Vercel with continuous updates as new projects are completed.
